INDEX

Page

Abbott, W. S., et al. (paper): Derris as an Insecticide 177–200
Abortus infection of bulls 239–246
Acetic-acid test, used in analyses of meat extracts 13–14
Aceton, "derrid" soluble in 179
Acid—
  acetic, used in analyses of meat extracts ... 13–14
  phosphoric, in meat extracts 4, 7–12, 14, 16
  sulphuric, effect on camphor seed 226, 237
Acidity, soil, influence on rootrot of tobacco. 53–60
Agglutinins, test for in *Bacterium abortus* .. 239–246
Alcohol, "derrid" soluble in 179
Alkalinity, soil, influence on rootrot of tobacco 53–60
Anisota senatoria, toxity of Derris to 196–200
Ants. See *Monomorium pharaonis*.
Aphids—
  toxity of Derris to 181–200
  transmission of mosaic by 256–266
Aphis—
  false cabbage. See *Rhopalosiphum pseudobrassicae*.
  false turnip. See *Rhopalosiphum pseudobrassicae*.
  green apple. See *Aphis pomi*.
  green peach. See *Myzus persicae*.
  green potato. See *Macrosiphum solanifolii*.
  melon. See *Aphis gossypii*.
  pink potato. See *Macrosiphum solanifolii*.
  spinach. See *Myzus persicae*.
  sunflower. See *Aphis helianthi*.
  tulip-tree. See *Macrosiphum liriodendri*.
Aphis—
  gossypii, toxity of Derris to 190–200
  helianthi, toxity of Derris to 190–200
  mellifica, toxity of Derris to 181–183
  pomi, toxity of Derris to 193–200
  rumicis, toxity of Derris to 193–200
  spiraecola, toxity of Derris to 190–200
Appleman, Charles O., and Arthur, John M. (paper): Carbohydrate Metabolism in Green Sweet Corn during Storage at Different Temperatures 137–152
Arthur, John M., and Appleman, Charles O. (paper): Carbohydrate Metabolism in Green Sweet Corn during Storage at Different Temperatures 137–152
Ascochyta sp., on seeds, use of formaldehyde vapor against 36
Ash in meat extracts 3, 7–8, 14, 16
Asphalt—
  disperse colloids in 167–176
  ultra-microscopic examination of 167–176
Autographa brassicae, toxity of Derris to ... 196–200
Ayrshire cows, variation in quantity and fat content of milk 285–321

Page

Bacillus caratovorus, on seeds, use of formaldehyde vapor against 36
Bacterium abortus Infection of Bulls (paper) 239–246
Bedbugs. See *Cimex lectularius*.
Beetles, potato. See *Leptinotarsa decemlineata*.
Benzol, "derrid" soluble in 179
Bitumen, examined by ultra-microscope ... 167–176
Blattella germanica, toxity of Derris to 192–200
Buck, J. M., Creech, G. T., and Ladson, H. H. (paper): Bacterium abortus Infection of Bulls 239–246
Bulls, abortus infection of 239–246
Cabbage—
  aphis, false. See *Rhopalosiphum pseudobrassicae*.
  worms. See *Autographa brassicae*.
Calcium—
  carbonate—
    effect on plant growth and composition. 90–100
    in Oregon soils 89
    used in grinding cell for ultra-microscopic examination 169–171
  oxid in Oregon soils 89
  sulphate, effect on plant growth and composition 90–100
Camphor seed, effect of removing the pulp from 223–237
Carbohydrate Metabolism in Green Sweet Corn during Storage at Different Temperatures (paper) 137–152
Carbohydrates in meat extracts 16–17
Carbon—
  dioxid, relation to storage of sweet corn 278
  disulphid, "derrid" soluble in 179
Caterpillars, tussock-moth. See *Hemerocampa leucostigma*.
Certain Relationships between the Flowers and Fruits of the Lemon (paper) 153–165
Chicken—
  lice. See Mallophaga.
  mites. See *Dermanyssus gallinae*.
Chlorid, sodium, in meat extracts 3, 7–8, 14, 16
Chloroform, "derrid" soluble in 179
Cimex lectularius, toxity of Derris to 192–200
Colletotrichum gloeosporioides, on seeds, use of formaldehyde vapor against 36
Collins, G. N. (paper): Structure of the Maize Ear as Indicated in Zea-Euchlaena Hybrids 127–135
Colloids—
  method of counting 172–173
  ultra-microscopic examination of 167–176
Complement-fixing bodies in *Bacterium abortus* 239–246
Copper test of meat extracts 15–16

Page

Corn, sweet. See Sweetcorn.
Cows, Ayrshire, variation in quantity and fat content of milk 285-321
Creatin in meat extracts 6-16
Creatinin in meat extracts 6-16
Creech, G. T., et al. (paper): Bacterium abortus Infection of Bulls 239-246
Ctenocephalus canis, toxity of Derris to ... 192-200
Datana ministra larvæ, toxity of Derris to .. 196-200
Datanas. See *Datana ministra*.
Dequelia spp. Syn. *Derris* spp.
Dehiscence of anthers, effect of rain 110-113
Dermanyssus gallinæ, toxity of Derris to ... 192-200
"Derrid," substance derived from *Derris elliptica* 179
Derris as an Insecticide (paper) 177-200
Derris—
  elliptica—
  fish poison 177-178
  insecticide 177-200
  robusta, insecticide 177-200
  scandens, insecticide 177-200
  uliginosa, insecticide 177-200
  spp., extracts from, methods of preparing 180-191
Derris—
  contact insecticide 189-200
  histological methods of tracing poison of. 197-199
  pharmacological effects of 197-199
  stomach poison 182-200
Disinfection of seed by formaldehyde vapor ... 33-39
Disperse colloids, ultra-microscopic examination of 167-176
Dog fleas. See *Ctenocephalus canis*.
Dorsey, M. J. (paper): Relation of Weather to Fruitfulness in the Plum 103-126
Effect of Removing the Pulp from Camphor Seed on Germination and the Subsequent Growth of the Seedlings (paper) 223-237
Effects of Heat on Trichinæ (paper) 201-221
Emery, James A., and Henley, Robert R. (paper): Meat Extracts, Their Composition and Identification 1-17
Errata and authors' emendations 111
Euchlaena—
  alicoles—
  separate 128-133
  two-ranked 128-130
  spikelets single 128-133
  Euchlaena mexicana—
  structure of ear of *Zea mays* compared to. 127-135
  pistillate inflorescence of 127-135
Ether, "derrid" insoluble in 179
Ewes' milk, quantity and composition of 19-32
Extracts, meat. See Meat extracts.
False cabbage aphis. See *Rhopalosiphum pseudobrassicæ*.
False turnip aphis. *Rhopalosiphum pseudobrassicæ*.
Fertilization, in plum, limiting factors 118-124
Foliage inoculations with mosaic 253-255
Folsom, Donald, et al. (paper): Investigations on the Mosaic Disease of the Irish Potato 247-274
Formaldehyde vapor, seed disinfection by ... 33-39
Free-reducing substances, loss from sweetcorn during storage 142-152

Page

Frequency distributions for variation in milk yield 287-321
Fruit buds of lemon, seasonal distribution of 154-156
Fruit—
  lemon—
  relation to flowers 153-165
  time required to mature 161-162
  setting of, in plum 105-123
Fusarium vasinfectum, on seeds, use of formaldehyde vapor against 36
Germination, camphor seed, effect of—
  drying 226
  fermentation 226, 237
  freezing 224-237
  heat 226, 237
  picking from ground 224-237
  removing the pulp 223-237
  soaking in sulphuric acid 226, 237
  soaking in water 224, 237
  time of planting 225, 237
Glacial acetic acid, "derrid" soluble in 179
Grafting, transmission of mosaic by 251-253
Green apple aphis. See *Aphis pomi*.
Green peach aphis. See *Myzus persicæ*.
Green potato aphis. See *Macrosiphum solanifolii*.
Hartman, R. E., and Johnson, James (paper): Influence of Soil Environment on the Root-rot of Tobacco 41-86
Hawkins, Lon A., et al. (paper): Investigations on the Mosaic Disease of the Irish Potato 247-274
Heat—
  effect on—
  toxity of Derris extract 182-184
  trichinæ 201-221
  See also Temperature.
Hemerocampa leucostigma, toxity of Derris to 182-200
Henley, Robert R., and Emery, James A. (paper): Meat Extracts, Their Composition and Identification 1-17
Higgins, C. H., and Stevens, Nell E. (paper): Temperature in Relation to Quality of Sweetcorn 275-284
Hildebrandt, F. Merrill, et al. (paper): Investigations on the Mosaic Disease of the Irish Potato 247-274
Hill selection, effect upon mosaic of *Solanum tuberosum* 267-270
Histological examination for *Bacterium abortus* 242-246
Histological methods of tracing Derris poison 197-199
Honeybee. See *Aphis mellifica*.
House flies. See *Musca domestica*.
Hybrids, Zea-Euchlaena, structure of ear .. 127-135
Hyphantria cunea, toxity of Derris to 182-200
Iddings, E. J., and Neidig, Ray E. (paper): Quantity and Composition of Ewes' Milk: Its Relation to the Growth of Lambs 19-32
Illinoia, sp., toxity of Derris to 190-200
Inflorescence—
  lemon, size and productiveness of 156-160
  maize ear, structure of 127-135
